PROFILE

First-year Information Science Engineering student who enjoys building practical projects and exploring new technologies. Actively participate in hackathons, including a Top 5 placement. Seeking an internship to gain hands-on experience and contribute to meaningful projects.

PROJECTS

WhatsApp Lead-Nurturing Workflow | *n8n, Docker, Google Sheets* Personal Project

- Automated a WhatsApp follow-up workflow using **n8n** and **Docker**, with **Google Sheets** to track leads and messages.

Coding Assistant Integrations | *MCP, Playwright, Firecrawl* Personal Project

- Connected AI coding assistants with **MCP**, **Playwright**, and **Firecrawl** for browser automation and web data extraction, with outputs synced to Google Sheets.

Bookbot | *Python, OOP, CLI* Boot.dev

- Built a CLI text analyzer that counts **word and character frequencies**, using Python classes and methods.

Asteroids Clone | *Python, Pygame* Boot.dev

- Built an Asteroids-style game with **Python and Pygame**, implementing player movement, collision detection, and game-loop logic.
